### SCHOOL BUS INCIDENT

Submitted by GYPSD

At approximately 4:20 p.m. on October 7, 2019, School Bus W-03 was involved in a collision with another vehicle at the intersection of Highway 753 and Township Road 534 on its regular route home from schools in the Lobstick zone. Four students from Wildwood School and Grand Trunk High School along with the driver were on board. The students have been trans-

ported for further medical assessments and the driver of the second vehicle has been air-lifted to Edmonton for further medical treatment.

Carolyn Lewis, Superintendent of Schools, expressed her concerns and stated, "Our thoughts and prayers are with those affected by today's incident. We offer our sincere appreciation for the quick response, level of care, and support of local emergency personnel along

with members of our Transportation staff who were on scene to assist the driver and students to treat the injuries that were sustained during the incident."

Families of the students on the bus were notified as per the division's emergency response plan.

The bus driver is being held out of service while the incident is under full investigation by local police and Grande Yellowhead Public School Division.

### RCMP MAJOR CRIMES UNIT LAY SECOND DEGREE MURDER CHARGE

Submitted by RCMP Major Crimes Unit

Paul First Nation, Alta. - On October 2, 2019, the Parkland RCMP responded to a call to assist EMS with a deceased male who was located at the Paul First Nation Transfer Station. The Major Crimes Unit responded and along with Parkland RCMP conducted the suspicious death inves-

tigation.

An autopsy was conducted and determined that the male died as a result of blunt force trauma injuries. A suspect was identified and the resulting investigation involved the use of search warrants and assistance of the RCMP Forensic Identification Services and Collision Analysts.

On October 5 the RCMP arrested 37-year-old Chris-

topher Adam Appleby who has been charged with second degree murder in the death of 48-year-old Jamie Saulteaux of Paul First Nations.

A judicial interim release hearing has been held and Appleby has been remanded in custody. His next court appearance is scheduled for October 9, 2019 at the Provincial Court of Alberta in Stony Plain.

# ALBERTA RCMP REMINDS CITIZENS OF CRIME PREVENTION FOR CABINS

Submitted by Alberta RCMP

Fall is the time of year Albertans start to close up their cabins and recreational properties for the season. Alberta RCMP urge citizens to consider crime prevention while winterizing.

In 2017 and 2018, October was the highest month for break and enters to seasonal residences. This is due, in part, to residents closing

up their cabins for the winter season. In October 2018, there were 70 break and enters to seasonal properties and over 550 for the year.

The second highest month for break and enters to seasonal properties was May with 56 reports. Many break and enters occur over the winter season, but are not reported until cabins are opened in the spring.

Here are some simple tips for protecting your seasonal property:

- Trim shrubs and trees to create clear sight lines
- Install timers on interior lights
- Bring home expensive tools and toys
- Post signage stating all valuables removed
- Install motion sensor lights outside
- Check on your property

periodically

- Put away outdoor furniture that can be used to get to the second floor

- Install solid-core doors
- Lock doors, windows and the shed

For the month of October, follow #SeasonalSafety for more safety tips and follow our social media accounts on Facebook (@RCMPinAlberta), Twitter (@RCMPAlberta) and YouTube (RCMP-GRC Alberta).

RCMP encourage the public to report any suspicious activity to police. If you see a crime in progress, dial 911. If you wish to remain anonymous, contact Crime Stoppers at 1-800-222-8477 (TIPS), online at www.P3Tips.com or by using the "P3 Tips" app available through the Apple App or Google Play Store.

Submitted by Grande Yellowhead School Division and Grande Public School Division

GYPSED schools across the jurisdiction proudly stepped up in support of the annual Terry Fox Run

and raised over \$15,000 for cancer research. Along with the great physical exercise, many students had extra incentives for their humanitarian efforts such as an afternoon of movies and popcorn when a school's fundraising goal

was reached. But to sweeten the deal, staff at SonRise in Grande Cache offered to be taped to the gym wall by students if they exceeded their goal, and Principal James Randall of Wildwood and Evansview schools agreed

that students could hit him in the face with a pie. A picture is worth a thousand words...need we say more?! Please visit our Facebook page at [www.facebook.com/gypsd](http://www.facebook.com/gypsd) to view more pictures from the different school events.

Each student chose a character trait that best described them, or was one they would like to develop. Students researched some quotes for their trait. Ms. Morrison then

## TIRE MAINTENANCE KEEPS DRIVERS SAFE

Maintaining tires is an important component of safe driving. Tires are some of the hardest working parts on a car or truck and are subjected to wear and tear every time rubber meets the road.

Tires affect many components of driving, including handling, braking and the comfort of the ride. Maintaining tires makes driving safe not only for drivers and their passengers, but also for fellow motorists.

The National Highway Traffic Safety Administration says that, in 2017, 738 fatalities occurred because of tire-related crashes. Many of those crashes were no doubt preventable, and that only highlights the importance of maintaining tires and monitoring their performance.

Poor tire maintenance can lead to premature wear and potentially result in a blowout. The automotive group AAA notes it is important to visually inspect tires as often as possible. Drivers should look for overall tread wear. Pay special attention to tread wear on one edge of the tires, which could indicate poor alignment. Erratic tread wear may mean tires are out of balance.

Drivers also should pay attention to how their cars drive and sounds. Unusual vibration or thumping noises suggest issues with the tires. A car that pulls in one direction also may be experiencing tire problems.

Vehicle owners should be aware of the routine maintenance steps that can keep

them safe and improve the life expectancy of tires.

- **Tire pressure:** The NHTSA says only 19 percent of consumers properly check and inflate their tires. Keeping tires properly inflated is one of the most important steps to maintaining them. Tires lose around 1 psi per month, and underinflated or overinflated tires can contribute to unusual wear, blowouts and even excessive fuel consumption.

- **Rotation:** Check the owner's manual or recommendations from the tire manufacturer, but know that most mechanics advise having tires rotated every 5,000 to 8,000 miles. Rotation helps distribute wear more evenly on tires.

- **Balancing:** AAA says

balancing also helps minimize uneven wear and tear. Balanced tires are achieved by using small weights attached to the wheels to limit vibration of the tire and wheels as they turn. New tires should be balanced, and tires also should be balanced after one or more is removed to repair a puncture.

- **Alignment:** Vehicles have wheel alignment measurements that pertain to manufacturers' specifications. Alignment that falls outside of the range can impact handling, fuel economy and tread wear. A drift or pull suggests alignment problems and should be addressed.

Vehicle owners should keep tire inspection and maintenance in mind as part of their overall car care plan.

## 3 POTENTIAL INDICATORS OF ENGINE TROUBLE

Many drivers have found themselves stranded on the side of the road at one point or another. Whether the culprit is engine trouble, a flat tire or another issue, finding oneself stranded on the side of the road in need of assistance is an often helpless feeling that no one wants to experience twice.

Even drivers whose automotive clubs or insurance companies provide roadside assistance services want to avoid using such services. One way to do just that is to learn about potential indicators of engine trouble.

### 1. Warning lights

Vehicle warning lights exist for a reason. According to the automotive retailer Pep Boys® a check engine

light typically illuminates when vehicle sensors detect there are issues stemming from a loss of power. This can be dangerous, and Pep Boys® recommends drivers pull over and call for a tow the moment the light comes on. In addition to check engine lights, drivers should heed warning lights referring to oil pressure and oil levels.

### 2. Poor gas mileage

An easy way for drivers to monitor vehicle performance is to keep gas mileage in mind. If a vehicle suddenly feels like it's not getting as much mileage out of a tank of gas as it used to, this might be indicative of engine troubles. A fuel additive such as a fuel injector cleaner might be helpful be-

cause it can clean clogged fuel injectors that can affect performance and lead to poor acceleration. However, the automotive retailer Advance Auto Parts® notes that such products are not a one-size-fits-all cure. If vehicles continue to suffer from reduced gas mileage, drivers should bring them to a mechanic for a thorough examination.

### 3. Jerking

Some signs of engine trouble are not as subtle as reduced gas mileage. Vehicles that begin to jerk while they're being driven are likely suffering from some form of engine trouble. Jerking might put a scare in drivers, but it's not necessarily the result of a major problem, even if it is one

that should be addressed immediately. A jerking vehicle that stalls puts drivers, their passengers and other motorists at risk of accident, so bring this issue to the attention of your mechanic immediately. Poorly functioning spark plugs may be the culprit behind jerking, and that's a relatively inexpensive and quick fix. However, other issues can cause jerking as well, so don't delay in speaking with your mechanic.

Vehicles may indicate engine troubles in various ways. Drivers should contact their mechanics immediately whenever they suspect engine trouble is affecting their vehicles.

# SUDOKU OF THE WEEK

## Fun By The Numbers

**Here's How It Works:** Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

**ANSWER:**

2	8	6	4	1	3	5	7	9
1	9	5	2	7	6	8	4	3
4	7	3	8	9	5	6	2	1
