Lac Ste Anne County. They were believed to be using the family UTV side-by-side before travelling out of the area as a family.

Dec. 26, 2023, Parkland RCMP continued search and rescue efforts in an area near the Alexis Bridge, off

Range Road 40A. Recovery of the Pelsma family was conducted by members of the Parkland RCMP, Lac Ste Anne County Fire Service and an Underwater Recovery Team.

“This is a sad outcome, the loss of any life is tragic” says Cpl. Patrick Lambert – RCMP Public Information

Officer, “The loss of this entire family is truly devastating over the holidays. Our thoughts are with the community and their extended family.”

The three deceased have been taken to the Edmonton Office of the Chief Medical Examiner where an autopsy will be conducted later this week.

The Alberta RCMP remind all Albertans and outdoor enthusiasts of the dangers of unpredictable thin ice and open water. Ice should be at least 15cm thick for a person to walk or skate on, 20cm for a group of people and 25cm for snowmobiling or using off highways vehicles on.

# Alberta RCMP Reminds Citizens About Ice Safety

*Continued from Page 1*

Albertans the dangers of unpredictable thin ice and open water. If you choose to go out on the ice, keep in mind the following safety tips:

**Consider Conditions:** Keep a close eye on the weather, changing weather can make ice surfaces unpredictable. Do not travel over ice in early and late winter when conditions are more likely to be dangerous. Avoid slushy, thawed, recently refrozen ice, or ice near moving water. Avoid going on the ice at night as reduced visibility increases the risk of falling through.

Always check the ice for thickness and stability. The colour of ice may be an indication of its strength – clear blue to black ice is strongest, and likely the deepest. You should only

skate or walk on ice that is 15+ cm thick, 20+ cm for a group of people and 25+ cm for off highway vehicles. White opaque or snow ice should be avoided, grey ice indicates the presence of water and is unsafe to stand on.

**Plan Ahead:** Don't travel on the ice alone. Leave a trip plan with someone that includes where you're going, for how long, and when you will be back. If you are unable to leave a trip plan with someone, leave a note on your car windshield. Don't drink alcohol and travel on ice, alcohol impairs judgment and reduces your ability to stay warm in cold conditions.

**Safety:** When spending time on the ice, you should always be prepared for the worst-case scenario and have an emergency plan.

**Be Prepared:** Carry a personal safety kit that includes:

- a lighter
- waterproof matches
- fire starting materials
- pocket knife
- whistle
- cellphone in a waterproof pouch

Carry a fully-charged GPS, a compass and map as a backup, and know how

to use them. Familiarize yourself with your buckles, bindings, and belts on equipment so they can be removed quickly if needed. Changing weather conditions can also affect ice from day to day. So, remember, if in doubt, don't go out! Should you need emergency services, dial 911.

**JOKE of the week**

On New Year's Eve, Marilyn stood up in the local pub and said that it was time to get ready. At the stroke of midnight, she wanted every husband to be standing next to the one person who made his life worth living. Well, it was kind of embarrassing. As the clock struck, the bartender was almost crushed to death.

# SUDOKU

*of the week*

**Here's How It Works:** Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

**Like puzzles?** Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!
